Standards are important

Yet in 1992, in spite of over ten years of hard work, the ACR-NEMA standard for medical imaging was floundering

LESSONS LEARNED

The value of public demonstrations was confirmed

Recognition of the importance of an impartial provider of infrastructure

Images alone are not enough

How can we arrange to have all of the computer systems in a medical enterprise communicate with one another?

Can images be incorporated in the Andover Working Group project?

Dick Corley

Discussion at 1996 RSNA annual meeting

re: IHE Logo

date: October 17, 1997

As a result of a 10 person vote (PCI and RSNA staff), please find enclosed the preferred IHE sample logo. If no one objects, we will use this as the official logo. If you have any comments, please let me know at your earliest convenience.

Thanks, Jamie

HIMSS/RSNA Partner Effort to Integrate Health Information Systems

Orlando, Fla. (February 23, 1998) -- A cooperative effort to facilitate comprehensive integration among various electronic healthcare information and management systems was announced here today by the Healthcare Information and Management Systems Society (HIMSS) and the Radiological Society of North America (RSNA).

"In today's information age, patients and their caregivers must consider a wide range of information to make the best medical decisions," said Cynthia Spurr, MBA, RNC, FHIMSS, corporate director of clinical systems management at Partners Healthcare System, Boston, and 1997/98 president of HIMSS. "Although considerable medical information is currently being stored electronically, it may originate from a variety of sources that are not linked or compatible. For example, users have to go one place to see the written report of an x-ray examination and another place to see the x-ray itself.

SUBJECT: IHE MEDIA COVERAGE

This is a report of completed media coverage of the RSNA/HIMSS Integrating the Healthcare Enterprise initiative. Media relations activity has focused on select radiology, technology and healthcare trade publications.

A total of seven placements are completed, reaching an estimated audience of more than 136,449.

An asterisk (*) indicates an addition to last month's report.

14. Staff John Page, HIMSS; Chris Carr, RSNA; Steve Drew, RSNA;

15. RSNA ECC Committee Robert Greenes, MD Gilbert Jost, MD

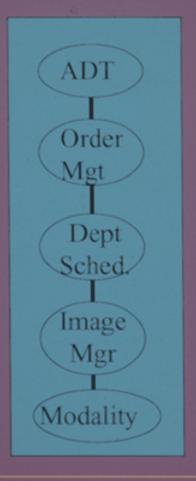

IHE Structure and Participation

- Year 1 of multi-year project
- Technical and Planning committees develop Technical Framework and Demonstration Concept documents
- Participation in demonstration open to all qualified vendors
- Schedule of events to prepare for demonstrations

Multi-Year Demonstrations

- Showcased at RSNA and HIMSS
 - year one: 1999 RSNA / 2000 HIMSS
 - long-range commitment
 - conveying a vision of interoperability in practice
- Demonstrates the growing and evolving capabilities of standards
- Clinical scenarios to convey real-life impact and benefit for healthcare providers

A Multidimensional Vision for IHE

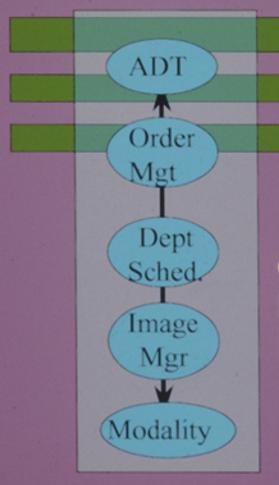

IHE Year 1 Vertical Integration for Radiology

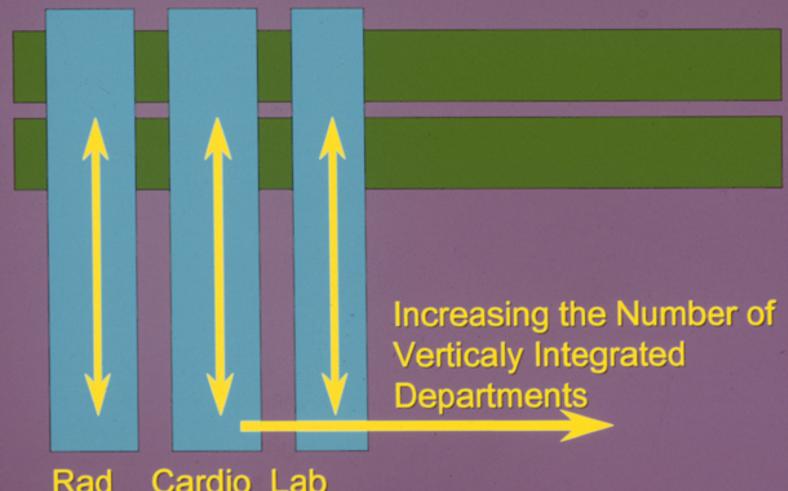

Dimension 1 for IHE growth

e.g. Master Patient Index

Growing the Horizontal HealthCare Enterprise Integration

Dimension 2 for IHE growth

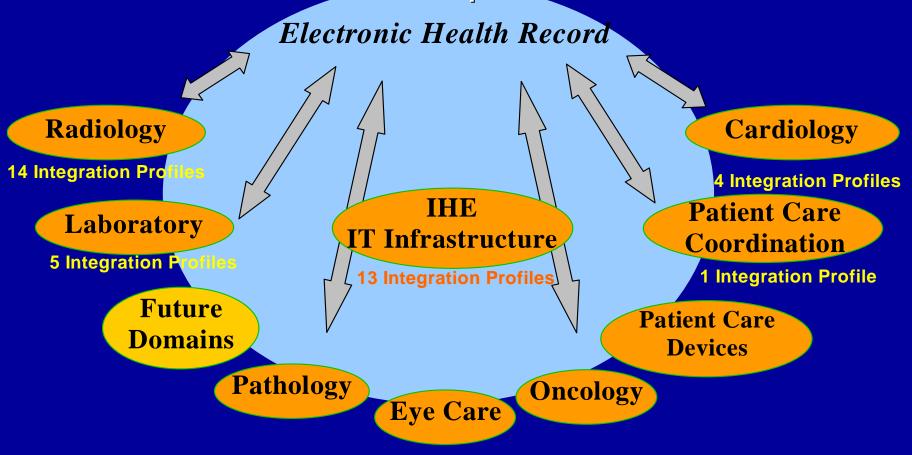

Cardio Lab Rad

IHE Over Time

- Year 1 Initial functional systems architecture
- Year 2 Expanding radiological transactions from registration to reporting
- Coming in Year 3
 - Further expansion of radiological transactions
 - Include other disciplines?

IHE 2006 – Nine Active Domains

Over 100 vendors involved world-wide, 5 Technical Frameworks
37 Integration Profiles, Testing at Connectathons
Demonstrations at major conferences world-wide
15 Active national chapters on 4 continents

LESSONS LEARNED

Industry should drive the process

A neutral party should act as a facilitator

Publicity is key to maintain momentum and to draw in new participants

IS THE BIOMARKER INITIATIVE MORE COMPLICATED?
